CLAIMS

What is claimed is:

1   1.   A method of displaying a compound word, the method comprising:

2   locating a component word within said compound word; and

3   displaying said compound word with said component word visibly distinguished from

4   the remainder of said compound word.

1   2.   The method of Claim 1, further comprising:

2   receiving said component word as user input;

3   based on said component word, selecting, from a plurality of resources, one or more

4   resources that are associated with said component word.

1   3.   The method of Claim 2, further comprising:

2   displaying one or more portions of said one or more resources, wherein each of said

3   one or more portions includes said compound word.

1   4.   A method of displaying a compound word, the method comprising:

2   receiving a component word as user input;

3   based on said component word, selecting, from a plurality of resources, a first

4   resource that contains a first compound word that contains said component

5   word;

6   based on said component word, selecting, from said plurality of resources, a second

7   resource that contains a second compound word that contains said component

8   word;

9   displaying said first compound word with said component word visibly distinguished

10   from the remainder of said first compound word;

11		displaying said second compound word with said component word visibly
12		distinguished from the remainder of said second compound word;
13		wherein said first compound word differs from said second compound word.

1 5. A computer-readable medium carrying one or more sequences of instructions which,

2 when executed by one or more processors, causes the one or more processors to

3 perform the method recited in Claim 1.

1 6. A computer-readable medium carrying one or more sequences of instructions which,

2 when executed by one or more processors, causes the one or more processors to

3 perform the method recited in Claim 2.

1 7. A computer-readable medium carrying one or more sequences of instructions which,

2 when executed by one or more processors, causes the one or more processors to

3 perform the method recited in Claim 3.

1 8. A computer-readable medium carrying one or more sequences of instructions which,

2 when executed by one or more processors, causes the one or more processors to

3 perform the method recited in Claim 4.
